Portfolio: **Ali-Khalil**

NASTYA DMS– Vue.js, Tailwind CSS

A document management system that manages the archives and documents for an organization(s), with many features, as archiving the document, classifying it, search for it, previewing it, sending it in an email, and even download it with it's details, with a theme picker that changes the whole system theme (this system contains 62 page coded with vue js and tailwind css as well as the user can feel the smoothness of it)

NASTYA FLOW– Vue.js, Tailwind CSS

A workflow system that manages the Chartered accountants in the organization, so the manages will track the orders of the customers all the way long inside the organization from the data entry employee to the final Auditor before the manager gives it an approved status, with a nice design and theme picker that changes the whole system theme.

pad.moys – Vue.js, Tailwind CSS, REST API

Official platform for the Ministry of Youth and Sports to manage and publish news, programs, and events. Includes dynamic content loading, secure user authentication, and admin dashboard for content management.

SKY Reed Diffuser – Vue.js, Tailwind CSS

A clean, modern product-landing website for a reed diffuser brand, built to showcase the product story (scents + “weather vibe”), highlight key features, and drive actions like ordering/contacting. It uses smooth, scroll-based sections (hero, product highlights, variants, gallery/details, and CTA/footer), fully responsive layouts, and reusable UI components styled with Tailwind so the whole experience feels fast, minimal, and premium. Deployed as a lightweight frontend site for quick loading and easy sharing.
