EXPERIENCE

I work with my backend team to provide and maintain powerful APIs and scalable projects.

EDUCATION

University of Information Technology and Communication,
Bachelor in Computer Engineering

DEC 2022 - Present

Pursuing a degree in Computer Science, Business, and Information Management.

PROJECTS

1-**Dentist Super App – ASP.NET Core & Flutter** – Mobile app for **purchasing dental products** and **booking dentist appointments**. Features include:

1. Dental appointment booking.
2. Ordering dental tools (for dentists or students).
3. Purchasing general dental healthcare products.
   Includes a **commission system** for sales representatives.

2-JobApplicationsApi – A Web API for managing and tracking job applications. Supports CRUD operations for candidates and applications, status tracking, search, and notifications, with data secured via JWT. Built with **ASP.NET Core** and **Entity Framework** using an SQL database.

3-ScientificCareBackend – A backend application for the **Scientific Care Department** at the **Ministry of Youth and Sports**. Manages departments, courses, course registrations, news, and workshops.

4-Center_for_Continuing_Education (Web Backend) – Manages **continuing education workshops**, including registration and payments via **cash** and **VSCards**.

5-UoitcMiniMoodle (Web Backend) – A backend application for managing **lectures, lecture content, and schedules** in a simplified way.

6-Small IoT Semester Project – Early 2025 – Remote PC controller

SKILLS

-Asp.net Core
