# MOHAMMED AHMED

Mobile application developer

## Work Experience

**SuperNova Agency**

Flutter Developer
Jun 2024 - July 2025

**SuperHackathon**

**Coordinator**

With my team at SuperNova, we worked together to create a unique experience for developers and programmers, in the first government supported hackathon in Iraq.

26-30 APR 2025

## Projects

### Choice (E-commerce Application)

Developed a fully functional e - commerce mobile application using Flutter with a clean architecture (MVVM). The app enables users to browse, search, and view services or products, add them to favorites, and view detailed service/company information with dyn amic API integration..

### Shiny (Weather Application)

Used Riverpod for
state management, Freezed for models, and Dio
+ Retrofit for API handling, Implemented GoRouter for flexible navigation and followed MVVM architecture.

### School (Absence Application)

Used Riverpod for
state management, Freezed for models, and Dio
+ Retrofit for API handling, Implemented GoRouter for flexible navigation and followed MVVM architecture.

### SuperNova Application

Used Riverpod for
state management, Freezed for models, and Dio
+ Retrofit for API handling, Implemented GoRouter for flexible navigation and followed MVVM architecture.

### Dento Application (Medical Clinic)

Used Riverpod for
state management, Freezed for models, and Dio
+ Retrofit for API handling, Implemented GoRouter for flexible navigation and followed MVVM architecture.

### Ministry of Youth and Sports Application

Used Dio+Retrofit for API handling, Implemented GoRouter for flexible navigation and followed MVVM architecture.

### To-do list (Managing Tasks Application)

USED Shared preference for Local storage
